
SURVIVALISTS

PROFILE

The Survivalists are the Opposition Party in Planet Parliament. The members of Planet Parliament all have a remit to protect the planet. Survivalists are cynics but not 'bad' people, nor is their Leader. They are non-violent but passionate and all signed up to their Party policy. They have proposed the motion: It is too late to save the Amazon.

VALUES

Survivalists believe mankind has destroyed the planet due to over-consumption and over-population. They believe the first law of Nature is the Survival of the Fittest so humans should not intervene to save humans or the burning Amazon rainforest. They think the Liberationists are weak idealists and investing tax payers money to save the Amazon is a waste of money.

LEADER'S MAIN SPEECH

The Leader's main speech: *Mr Speaker - The world's population has just passed nine billion. Nine billion! Thanks to human induced climate change, our planet can no longer carry half that number. It is our party's highest priority to ensure humane population decline. No more drugs is just what the doctor ordered! Let Nature take its course.*

AD-LIBBING

Ad-libbing is the usual shouting and repartee you get in the UK's Houses of Parliament but on message with the Survivalists values and debating position.
